

COMPREHENSIVE RETIREMENT STRATEGIES

Welcome to 2024!

Happy New Year!

Overall, 2023 was a good year for investors. Interest rates continued to rise, but at a much slower and less consistent pace than in 2022 and recession worries continued to make headlines, however investors still experienced strong positive returns in the major indexes in 2023.

Notably, the year ended on a high note in December as the Federal Reserve decided for the third straight time not to raise interest rates. They also indicated that interest rate cuts were forecasted to start in 2024. Equity markets responded favorably, and investors are seeing the light at the end of the pandemic-induced tunnel. While equities are looking brighter, this year brings a presidential election which could bring major changes. 2024 could prove to be a very interesting year.

Looking Ahead to 2024

While there are many aspects to overall financial planning, the following are some specific topics we will continue to watch carefully as we head into the new year.

- **Interest Rates:** Interest rate movements continue to be critical for investors. Since 2022, the Federal Funds Rate rose from a range of 0 – 0.25% all the way up to 5.25 - 5.50% by the end of 2023. Federal officials have indicated this may be the end of rate increases and are watching key indicators to assess if, when, and how much movement we will see in the federal interest rate range in 2024.
- **Inflation:** Inflationary concerns are important for investors. We saw a significant overall slowdown of inflation in 2023, however, there is still more to be done to reach the Fed's 2% target range. We will continue to monitor inflation numbers as the 2024 data becomes available.
- **Recession Risk:** While many analysts think we are out of the woods for a recession, there is still a possibility that one could just be delayed. The good news is the likelihood that a potential recession will be severe is low. The economy and employment remain strong, but we will continue to stay apprised of the direction of recovery efforts and how they are affecting the economy.
- **Stock Market Valuations:** Valuations are used as key predictors of equity returns. While we cannot predict long- and short-term valuations, we will continue to help you identify your risk tolerance and time horizons. We also understand that market volatility is a normal part of the investment experience and can help you use practical behavior when making financial decisions.
- **Our Client's Personal Situations:** First and foremost, our client's personal situations are always our highest priority. We are here to help them with any financial moves or concerns they have. We understand that each individual and household has different goals and needs. We will continue our tradition of keeping our clients informed of any changes that we think may affect their personal situation throughout the year.

As we step into 2024, we remain guided by the enduring principle of "navigate with prudence," acknowledging the importance of thoughtful consideration and strategic decision-making in the dynamic landscape ahead. Having a solid foundation and strategy is critical to the outcome of your financial plans. Revisiting your plan and keeping it current is also a sound practice we feel should be conducted on a consistent basis.

We want to provide you with guidance and support on your journey toward your financial goals! This is a good time to review your plans with us. We can help you determine if you are on track to meet your long-term objectives, confirm your time horizons and assess your risk tolerance. Call us at 215-968-1820 for available dates and times and get ready to make 2024 a great year on your journey toward your financial goals!

After reviewing this list, please call our office to discuss any items you have checked off. This will help us advise you in the most effective and proactive manner.
